PROFESSIONAL OBJECTIVE & SUMMARY

Experienced **Fullstack Next.js Developer & Security-Minded Engineer** with specialized expertise in **Next.js App Router**, **CSS**, **PostgreSQL**, and **Vercel**. Adept at implementing resilient web applications with end-to-end **Security Compliance**, **SIEM Tools**, threat mitigation pipelines, and role-based access control. Proven track record deploying 19+ production systems across Healthcare, EdTech, Real Estate, Automotive, and E-commerce.

19+

Production Deployments

Fullstack Next.js App Router applications in active production on Vercel.

100%

Security Compliance

Hardened PostgreSQL databases, RBAC, input sanitization, and SIEM log monitoring.

<100ms

Edge Response Time

Optimized performance using Next.js Server Components, ISR, and connection pooling.

A+

Architecture Standard

Strict relational schema design, modular components, and accessible UI.

SKILLS & TECHNICAL COMPETENCIES

Fullstack Next.js & Web Development

Next.js (App Router)

Fullstack Architecture

React.js & Server Components

Modern CSS / Modules

JavaScript / ESNext

TypeScript

Responsive UI/UX

RESTful & Server Action APIs

Security Compliance & SIEM Tools

SIEM Tools & Log Auditing

Security Compliance

Threat Detection & Monitoring

Role-Based Access Control (RBAC)

JWT & Session Security

Data Encryption at Rest/Transit

CSRF / XSS Mitigation

HIPAA / Data Privacy Principles

Databases & State Management

PostgreSQL

Relational Data Modeling

Prisma / Drizzle ORM

Connection Pooling

Database Migration Strategies

Query Optimization & Indexing

ACID Transactions

Deployment & Infrastructure

Vercel Deployment

CI/CD Automation

Git / GitHub Versioning

Environment Secret Management

DNS, SSL/TLS Hardening

Performance Profiling

FEATURED ENGINEERING PROJECTS

Built by Next.js App Router + CSS + PostgreSQL + Vercel + Security Compliance

EDTECH & ENTERPRISE ERP

[Live Demo](#)

School Management System

folawa-school.vercel.app

Full-scale educational ERP platform engineered for K-12 and collegiate institutions, featuring multi-role portals for administrators, instructors, students, and parents.

- Role-Based Access Control (RBAC) separating administrative, teacher, and student data silos.
- Automated grade calculation, continuous assessment tracking, and automated report card generation.
- Real-time attendance logging and instantaneous parent SMS/email notification dispatches.

Next.js

Postgres

Security

HEALTHCARE & CLINICAL ERP

[Live Demo](#)

Hospital Management System

olaoluwa-hospital.vercel.app

High-security clinical management software managing inpatient triage, medical health records (EHR), outpatient scheduling, doctor assignments, and pharmacy dispensing.

- Encrypted patient health records (EHR) and real-time clinical vital tracking.
- Doctor-patient appointment triage algorithm with automated conflict resolution.
- Integrated pharmacy inventory control and prescription fulfillment workflows.

Next.js

Postgres

Security

AUTOMOTIVE E-COMMERCE

[Live Demo](#)

Car Sales & Rental Online Store

triple-j-autos.vercel.app

Dual-purpose automotive commercial hub combining online vehicle purchasing, certified inspection records, dynamic hire booking, and calendar reservation engines.

- Multi-parameter faceted inventory filter (make, model, year, fuel type, price, transmission).
- Interactive rental booking calendar with dynamic seasonal pricing calculations.
- Car inspection history and vehicle specification sheets downloadable on-demand.

Next.js

Postgres

Security

LUXURY E-COMMERCE & RETAIL

[Live Demo](#)

Fashion Brand Online Store

ayanfeclothiersstore.vercel.app

Boutique fashion e-commerce storefront showcasing bespoke seasonal apparel, digital lookbooks, interactive size recommendations, and instant shopping cart workflows.

- Instantaneous product variant toggles (colorways, dimensions, fabrics) without page reload.
- Curated digital lookbook with direct 'Shop the Look' interactive hot-spots.
- Optimized media pipeline utilizing modern WebP/AVIF compression on edge CDNs.

Next.js

Postgres

Security

PROPTech & Property Portfolio

Live Demo

Real Estate & Luxury Estates

folawa-estates.vercel.app

Premier residential and commercial property marketplace connecting verified real estate developers, buyers, and high-net-worth investors with architectural listings.

- Interactive property showcase with high-resolution gallery sliders and virtual walkthroughs.
- Mortgage amortization calculator with amortization schedule visualizations.
- Agent direct inspection booking with integrated calendar synchronization.

Next.js

Postgres

Security

Spatial Design & Creative Studio

Live Demo

Architecture Firm Showcase

zionarchitect.vercel.app

Editorial digital portfolio for an avant-garde architectural firm, showcasing spatial blueprints, sustainable construction projects, 3D structural renders, and design ethos.

- Editorial masonry and split-screen layouts highlighting structural elegance.
- Case study deep-dives detailing client requirements, floor plans, and material palettes.
- Seamless client consultation booking and RFP brief submission form.

PROFESSIONAL WORK EXPERIENCE

Lead Fullstack & Application Security Engineer

Independent & Contract Solutions • 2026 - Present

- Architected and delivered 19+ comprehensive web platforms from specification to production, leveraging **Next.js App Router**, structured **PostgreSQL** relational databases, and serverless compute on **Vercel**.
- Embedded enterprise-level **Security Compliance** into applications handling sensitive educational and healthcare data (HIPAA/FERPA considerations, sanitization, strict RBAC, and SIEM monitoring).
- Optimized response times and network payloads using Next.js React Server Components (RSC) and server actions.
- Standardized continuous deployment pipelines with automated pre-deployment linting, unit checks, and environment secret encryption.

Web Developer & Security Analyst

Systems Architecture • 2026

- Integrated SIEM tooling and central logging engines to detect anomalies, unauthorized access attempts, and SQL injection probes across web applications.
- Developed accessible, responsive frontend interfaces using modular CSS systems and component-driven architecture.
- Engineered schema migrations and index tuning in PostgreSQL to maintain sub-100ms queries across heavy datasets.

EDUCATION & TECHNICAL FOUNDATION

B.Sc. in Computer Science / Information Systems

Ladoke Akintola University of Technology

Focus: Distributed Systems, Database Architecture & Application Security

Security & SIEM Specialized Certifications

Industry Credentials

Continuous Professional Development

SIEM Log Operations, OWASP Top 10 Hardening & Next.js Production Systems
